

Resiplank

Aqua Protect Vinyl Floors

100% Waterproof Rigid Core flooring

RIGIDCORE.

Timeless and contemporary designs

The feeling that you get from the timeless look of authentic timber flooring is warmth. The very natural essence of classical wood grains featured in our Resiplank Rigid Core hybrid collections brings heart to your home while exuding a sense of style and design.

The three Resiplank Core hybrid collections offer an impressive range of 30 designs with a sophisticated variety of colour palette choices, and authentic Embossed-in-Register wood textures.

With their heavy-duty composite core supported by a super sound absorbent underlay, our Resiplank Rigid Core hybrid collections are in a class of their own. Strong, resistant to wear and 100% waterproof, the collections come with a Lifetime Structural Guarantee.

Installation is easy with the Välinge 5G drop-lock system, and the accentuated air of optimal softness and elegance that they create in your home will have you captivated every time you walk into a room.

Why choose Resiplank Rigid Core flooring

100% waterproof

Low maintenance

Acoustic sound reduction

Suitable for hydronic underfloor heating

Highly durable

Kid and pet friendly

Comfortable & warm underfoot

Environment friendly

Quick and fast installation

Authentic wood texture

Chiffon | 7128

Superior and resilient performance

Featuring micro-bevelled edges and manufactured using Co-extrusion technology, Resiplank Rigid Core hybrid flooring is resilient and superbly functional. It can be laid on a new subfloor or over existing hard floor covering with ease. The Resiplank Rigid Core collections will enhance your home with the perfect combination of luxury and low maintenance durability.

1. Resi-Protect PU Surface Treatment

Provides enhanced scratch, stain and slip resistance, with heightened durability and hygienic protection.

2. Resi-Clear Embossed Wear Layer

A transparent wear and protection layer that creates an authentic timber texture appearance.

3. High-Resolution Decorative Film

A superbly innovative design layer that replicates the appearance, style and colour of classic timbers.

4. Resi-Core Layer

Stone Plastic Composite (SPC) which is engineered for strength, 100% waterproof and conceals subfloor imperfections.

5. 5G Välinge Locking System

A patented joining mechanism that allows incredibly fast and easy installation.

6. Acoustic Backing Layer

An integrated, high-density EVA underlay provides impact sound reduction and moisture resistance, with a softer and warmer feel under-foot.

7. Anti-Bacterial PE Layer

Moisture proof protection where you need it the most.

NEW

Inspired by nature

The Resiplank Rigid Core 705 Eternity Collection has timeless appeal with its characteristic mix of Nordic, Scandinavian and coastal style. This natural range is both classic and warm.

Truly inspired by nature, the hybrid range of 10 designs in the Eternity Collection have been carefully selected for their authentic variations in tone and subtle grains to deliver true naturalism. Together with a fine wood grain surface texture, the Eternity Collection is expertly designed to bring natural beauty to your home.

Quality meets design

Engineered for strength and resistant to wear, the Resiplank 977 Summit Collection is where style meets strength. The high quality engineering and quality of the materials inherent in the collection, provide maximum stability and are low maintenance to complement your lifestyle.

The 977 Summit Collection is the perfect blend of quality and design which will bring a touch of luxury to your home. An authentic feel is delivered through the natural looking grain and knot patterns. Each pattern has been carefully created to express the natural aesthetics of real wood using authentic hues that range from softer to tones to darker nuances which brighten your space. These appealing hues, together with the refined bevels of each board, result in a luxurious yet natural look for your room.

Cleaning & Maintenance

Preventative Maintenance

It is only natural that Resiplank Rigid Core floors will show signs of wear over time. You can expect years of beauty from your floor by observing a few precautions and maintaining regular cleaning and maintenance routines.

- Keep dirt, sand, grit and water off the floor by placing outside mats in front of all entrances to your home.
- Sweep or vacuum regularly to rid the floor of dust and grit that can scratch the finish.
- Remove shoes with spiked or damaged heels before walking on the floor to prevent scratches and dents.
- Keep pets' claws trimmed, paws cleaned and free of dirt or soil.
- Always apply felt pads under any furniture or chair legs to prevent scratches and to ease movement. Keep pads clean at all times and regularly check and replace as necessary.
- Protect the floor when moving heavy furniture or large appliances. Place on mat and slide smoothly over floor.
- Never flood or wet mop floor with water or any other liquid products. Severe damage may occur that voids the warranty.
- Wipe up spills immediately with damp cloth.
- Exposure to sunlight with its UV rays accelerates oxidation and aging of materials. This may change the colour of the floor. Periodically rearrange the furniture to allow the floor to age evenly.

Cleaning After Installation

1. Remove all loose debris from the floor using a vacuum, brush or dust mop (if using a vacuum, please check the manufacturer's guidelines to make sure it's suitable for Resiplank Rigid Core).
2. Ensure that all dry adhesive or wax is removed from the surface.
3. Damp mop with a pH neutral detergent.

Routine Maintenance

The cleaning and maintenance regime, whether for commercial or residential homes is simple and can be carried out by hand or using mechanical cleaning apparatus.

1. Spills and tracked-in dirt should be wiped up immediately.
2. Periodically, as necessary, thoroughly clean the floor with a good quality spray mop and with a ph neutral cleaner. **DO NOT** allow excess cleaner to remain on the floor's surface. Excess liquid may damage both the surface and core of your Resiplank Rigid Core floor.
3. Vacuum, sweep or mop to remove all dust and loose debris (if using a vacuum, please check the manufacturer's guidelines to make sure it's suitable for Resiplank Rigid Core).

4. Stubborn stains can be removed by spot cleaning with concentrated ph neutral detergent.
5. Never use any of the following products (or similar in nature) on your floor: ammonia-based cleaners, acrylic finishes, wax-based products, bleach, polishes, oil soap, abrasive cleaning soaps, or acidic materials such as vinegar. Many of these products pit or etch the finish of your flooring or prevent the proper use of recommended maintenance materials.
6. Use interior and exterior doormats at all entrances to collect dirt and moisture and prevent it from being tracked onto the floor.
7. Area rugs are recommended in front of kitchen sinks, at all pivot points within high traffic areas. Do not use rugs with solid rubber or vinyl backings. The rugs must be made of a breathable material to prevent moisture entrapment.
8. Never clean or wet mop with water, it may permanently damage the floor.
9. Cut hair is very coarse and will abrade the surface of the flooring.
10. Keep animal nails trimmed to minimise finish scratches.
11. Do not damage your floor with shoes having heel taps or sharp objects protruding from the sole such as rocks, nails or gravel.
12. Avoid walking on wood floors with spike or stiletto heeled shoes. Spike or stiletto high heels must be properly maintained to prevent damage from the steel heel support.
13. Do not roll or slide heavy objects directly upon the floor. When moving appliances or heavy furniture, consider laying a solid protective covering on your floor and gently "walk" the item across it. Carpet or cardboard is not adequate to prevent surface compression scratches.
14. Use furniture leg protector pads under all furniture and make certain to keep them clean and well maintained.
15. The flooring should be protected with non rubber matting from damage by casters and wheels on furniture and chairs.
16. Protect your floor from direct sunlight. Use curtains and UV resistant film on large glass doors and windows. Colour shade variation can occur if the floor is exposed to direct sunlight.
17. **The use of any kind of steam mop is strictly prohibited. The use of a steam mop will cause irreparable harm to your floor and void your warranty.**
18. Radiant heat from fire places or heater should be avoided. Damage can occur.

IMPORTANT: Heavy objects such bookcases, billiard tables, kitchen units, that exceed 200kg/object area or if the load is greater than 30kg/cm2 should not be placed on a floating system. Damage can occur due to incorrect expansion and lack of correct raft movement.

We do not recommend adhesive tape is applied to any of our flooring products.

All warranties and product certificates please refer to website under downloads.
