Barrington

PREMIUM AUSTRALIAN TIMBER FLOORING A collection of refined surface forms

Barrington is a celebration of Australian timber in its most resolved form. Raw in nature, considered in execution. Responsibly sourced from the diverse landscapes of New South Wales and Queensland, it carries a gentle weight and intrinsic restraint.

The collection is crafted to honour individual grain and texture, with each board responding to light and shade through the timber’s subtle inflections. Engineered for conscious space-makers, Barrington invites the natural world in, its multiple widths creating opportunities for refined surface design that is grounded, tactile and an honest expression of form.

Its Blackbutt and Spotted Gum formats reflect the tonality and warmth of the Australian palette, elevating spaces through uncompromising quality and material presence. Blackbutt recalls early sunlight in its soft, blonde warmth, while Spotted Gum holds a deeper, richer hue – more robust in character. The inclusion of a smooth semi-gloss finish heightens natural tones that echo untamed terrain, expressive in detail yet naturally cohesive when set at scale.

Beyond material finish, Barrington forms a quiet architectural foundation, strengthening the connection between material, place, and purpose. A durable, sustainable flooring solution shaped by a lasting relationship to its elemental origins.
